Education

DAE

Back-end Web Developer 6-Month Program

New York, NY

July 2025 - Present

CUNY Baruch College

Bachelor of Arts, Biochemistry, magna cum laude

New York, NY

Skills

Technical: Node.js, Express, Python, Flask, Go | Databases: SQLite, SQLAlchemy | Auth & Security: JWT, AES-256 | DevOps: Docker, Vercel, CI/CD

Product Management: Product Strategy, Roadmapping, Feature Prioritization, KPI Definition, Stakeholder Management

UX & Research: User Interviews, Journey Mapping, Wireframing, Usability Testing

Tools: Rally, Jira, Confluence, Visio, LucidChart, Miro, Tableau, Salesforce

Methodologies: Agile/Scrum, Product Lifecycle Management, DevSecOps

Experience

Memorial Sloan Kettering Cancer Center

New York, NY

Senior Business Analyst

June 2023 - March 2025

- Translated business needs and user stories into technical requirements for developers, aligning digital solutions within a hospital-wide Epic implementation project for 21,000+ employees.
- Streamlined workflow processes by identifying and analyzing user needs, influencing the design of digital solutions and accelerating the transition from legacy systems.
- Validated solution usability by leading user acceptance testing (UAT) and creating prototypes, ensuring final delivery met business requirements and user expectations.
- Managed product backlogs and collaborated with developers on user story implementation, contributing to a seamless go-live transition for a complex, hospital-wide system.

Senior Technical Manager (Product/Program)

July 2022 – June 2023

- Engineered and implemented Airtable/Smartsheet-based automation solutions, increasing workflow efficiency by 20%.
- Built real-time reports and dashboards, enabling data-driven decision-making for project insights.
- Contributed to the development of an AI chatbot for IT training programs, demonstrating

experience with emerging technologies and product enhancement.

- Partnered with cross-functional teams to define product features, ensuring technical deliverables were aligned with strategic business goals.

DAE Project(s)

Project 2: Project Management Application

- Architected and developed a Node.js/Express RESTful API for a project management tool, implementing JWT-based authentication and secure, modular routes for full-stack functionality.
- Designed a SQLite relational database schema and integrated data endpoints to track clients, projects, and files, enabling detailed progress and client reporting.

Project 1: Adventure Text-Based Game

- Engineered a Python/Flask text-based adventure game with an interactive Tkinter GUI, designed to educate children by developing basic reasoning skills through an engaging learning experience.
